ECSEL JU

- Public-Private Partnership for Electronic Components and Systems
- World-class expertise in key enabling technologies
- Essential for Europe’s competitive leadership in digital economy
Together, we develop technological solutions to support citizens needs.

- Thinking together
- Working together
- Investing together

The Industry and research community is represented by three Industry Associations, who coordinate a commonly agreed technical agenda.

Direct participation of national and regional authorities assures the strategic relevance of the projects they fund, and offers an easy route to participating.

Support from the European Union, assures coordination across many countries and regions, reducing fragmentation and assuring a wide take-up of the results.
CALLS
Each year ECSEL JU launches projects through a process of open Calls for Proposals.

PROJECTS
Projects selected for technical excellence are selected for funding by the participating states and the EU (Commission), assuring their strategic relevance.

PARTICIPATIONS
With over 1300 unique organisations participating in the programme so far, some of them multiple times.

INDUSTRIES FINANCING
ECSEL JU projects produce results that are important for businesses, who co-invest more than half the total value in their development.

EU & NATIONAL FUNDING
The investments made by participating countries and regions, as well as the EU, in stimulating this important work.

RDI COSTS
The total money invested so far in developing societally relevant technologies in ECSEL JU projects.
